

### Classroom Technology: Engaging and Inspiring

As engaging as ghost stories around the campfire, the interactive classroom will keep students wide-eyed and on the edge of their seats. As the exclusive supplier of Promethean ACTIVboards in the Carolinas, CSI hears rave reviews that pour in from the front lines of education. At last, teachers and administrators have a way to use technology to connect with every student in their classes. The ACTIVstudio software and peripherals make learning so much fun that even the most introverted students gladly step into the spotlight.

ACTIVboard eliminates traditional chalkboards and engages every student in the learning process. Add stereo speakers, wireless tablets, student voting devices or almost any peripheral you can connect to a computer and you've created a learning environment with endless creative possibilities.

Interactive White Board (IWB) technology is changing the face of education...and its rising popularity has made it remarkably affordable!
